GENUINE
PARTS

DEAR H&R AGRI-POWER CUSTOMERS & FRIENDS,

Spring is a time for replenishment, renewal and new growth. As you return to the fields, taking advantage of the extra hours of daylight for seeds to be sown and new crops to be nurtured, our thoughts return to renewing and nurturing our ties with our friends and loyal customers. We are powered up to keep both you and your equipment running - from sunrise to sunset - with 21 locations across 6 states, which includes our Farm & Turf division, with stores in Benton, IL & McMinnville, TN and our Powersports division in Washington, IN.

As you journey through what we hope is a fruitful and prosperous year, we've built our H&R On The Farm Customer Handbook to travel along with you, from growing season through harvest, doubling as an extra "guide" for the many things that we believe are important both on and off the farm. You'll find page after page of quality parts plus the latest equipment offerings, giving you the "power to do more" in the coming months. Make sure to check out our weekly parts specials each month to help you save on the products you use most.

Whatever your needs are for the Spring and Summer months - from our complete line of superior quality parts to equipment ranging from tractors, mowers, and RTVs to sprayers, tillage, combines, and even power tools and shop supplies - our experienced, knowledgeable staff will always be available to offer their expertise in Parts & Service, Equipment Sales, Precision Technology, and much more - including reliable 24/7 emergency support.

Remember, as you "grow" this year, H&R Agri-Power will be as close as the turning of a page - or a phone call! It's our way of sticking to our number one commitment: your daily needs!

Thank you so much for your dedication and hard work, both on and off the field, and for putting your continued trust in H&R Agri-Power. Our hope is that we can continue to support you throughout the coming year and that through the grace of God, you will have good health, happiness and plentiful harvests.

Warm regards,

Steve Hunt

CONSOLATION FARMS

- CROFTON, KY -

A LEGACY HEADED FOR THE FIFTH GENERATION

Although Consolation Farms, by name, was established in 2000, the legacy it evolved from started many years prior. Bruce Cline, founder of Consolation Farms in Crofton, KY, is a third-generation farmer, having learned from his father Wayne Cline, young Bruce bravely started his own tobacco crop at the age of 11. You can certainly say farming is all Bruce has ever done.

Bruce and his beloved late wife, Candy, dedicated many years to the hard work and sacrifice required to grow their farming operation into the success it is today. In the formative years, Bruce would farm tobacco during the day, then work third shift at U.S. Tobacco in order to ensure the contracts for his crop. Meanwhile, Candy worked tirelessly in the office, serving as the true backbone of the farming operation, while also selflessly serving her family.

While these years may seem like a distant memory, the legacy formed there is now on display in the current generation as Bruce's daughter and son-in-law, Caitlin and Landon Hopper, have assumed crucial roles in the Consolation Farms day-to-day operations - with Caitlin following in her mother's footsteps overseeing the office and Landon serving as the farm manager.

Consolation Farms, as it stands today, looks quite a bit different from its humble beginnings with a modest tobacco crop. With approximately 150 acres of tobacco and 3,500 acres of row crop (corn, soybeans, wheat), it is a large operation with 8 full-time employees and up to 35 seasonal staff at any given time.

A large, multi-faceted farm such as this calls for durable equipment backed by a dealership willing to provide next-level service and support - this is where H&R Agri-Power is proud to call Consolation Farms a loyal customer.

The current farm fleet includes a Case IH 8250 combine, planter and several red tractors. With the size of the overall operation and the multitude of red machines, the value of responsive service is critical. "The service department with H&R Agri-Power is second-to-none and you can't just get that anywhere. The service has been a huge help," Landon explains.

Above and beyond the great working relationship between H&R Agri-Power and Consolation Farms, there is a special connection to salesman Terry Martin (Central Sales Manager) that stretches back many years.

"With H&R it all does start with the sales - Bruce and Terry have such a long history," Landon recalls.

Martin's memories of Bruce Cline go all the way back to his pre-teen years and he is quick to express how influential Cline has been on his life both professionally and personally. "Bruce was one of my first few customers," Martin states, "and one of the most giving people I've ever met. You can easily count 100 people he's taken under his wing and they've flourished," he concludes.

In retrospect, Bruce and Candy Cline indeed built a successful farm, but more importantly they built a strong family around that farm. And now with several of the grandchildren showing real interest in farming, it looks like there could be **a legacy headed for the fifth generation.**

We thank Consolation Farms for choosing reliable Case IH equipment and for making H&R Agri-Power their trusted dealership partner!

Dedicated in loving memory to Candy Cline, beloved wife, mother and grandmother. A person who was successful at building a farm, but even more successful in building a family. You are greatly missed by your husband, Bruce, the Hopper and Allen families and the entire community for which you cared so deeply.

The Consolation Farms family (left-to-right, back-to-front): Caitlin Hopper, Landon Hopper, Josh Allen, Taylor Allen, Callyn Hopper, Candy Cline, Kilian Allen, Bruce Cline, Amelia Allen, Lilly Allen & Macon Hopper

MAGNUM SERIES

Each model year, Case IH strives to integrate the latest industry innovations and technology enhancements for their customers. The Magnum Series Tractor for 2025 delivers upgrades that blend power, efficiency, and seamless technology. Designed to elevate performance, productivity, and connectivity, these tractors feature upgrades to six flagship models that redefine industry standards while maintaining renowned durability. *Exciting new updates for the model 2025 year include:*

- **Precision Technology Packages:** choose between two streamlined tech packages, offering subscription-free software bundles, in-cab display options, lifetime telematics connectivity & advanced automation technologies for smarter performance
- **Increased Horsepower:** new models like the Magnum 355 and 405 boast up to a 15 HP increase at rated speed
- **Enhanced Accuracy:** the Vector Pro receiver, with AFS1 correction level, improves pass-to-pass accuracy by 40% over previous models
- **Stay Connected:** monitor and manage your fleet remotely with integrated Case IH precision technology included in every tractor
- **Advanced Transmission:** features like APM 2 and Brake-to-Clutch make shifting and braking much easier

Available at all H&R Agri-Power locations except Benton, IL & McMinnville, TN.

- ✓ **Horsepower Range:** 180 - 405
- ✓ **PTO Horsepower Range:** 155 - 345
- ✓ **Transmission:** PowerDrive or CVXDrive options
- ✓ **FPT Engine:** 6.7 & 8.7L
- ✓ **Hydraulic Capacity:** up to 86 gpm
- ✓ **Reimagined Luxury Cab** improved operator area
- ✓ **Powerful Exterior Features** enhanced front & side visibility 360 degree LED lights, breakaway-style marker lights, four camera heads
- ✓ **Ground-Level Fluid Checks** industry-leading 600-hr oil change intervals
- ✓ **True Remote Management** AFS Connect technology package

MAXXUM® SERIES

Hardworking Versatility On Demand

Case IH Maxxum® Series tractors combine efficient power with operator convenience. Powered by FPT engines, these multipurpose workhorse tractors deliver increased productivity, performance and fuel efficiency to keep your operation running smoothly.

- ✓ **Horsepower Range:** 116 - 150
- ✓ **PTO Horsepower Range:** 95 - 125

VESTRUM® SERIES

Compact Size, Premium Features

Case IH Vestrum® Series tractors provide maneuverability and premium cab comfort in a compact design with more than 100 engine horsepower to accomplish a wide variety of tasks. A 4.5L engine delivers more low-speed torque and better engine responsiveness. Say hello to power, maneuverability and premium cab comfort in a compact design.

- ✓ **Horsepower Range:** 100 - 130
- ✓ **PTO Horsepower Range:** 76 - 111

FARMALL® UTILITY A SERIES

Medium Utility

Featuring more horsepower, Farmall® Utility A Series tractors accomplish the most demanding tasks on any operation. Greater durability, more features and ultra-comfortable cab options make these models a perfect fit for livestock jobs, mixed farms and specialty operations like poultry farms, orchards and vineyards.

- ✓ **Horsepower Range:** 97 - 120
- ✓ **Additional Configurations:** low-profile & poultry

FARMALL® UTILITY C SERIES

Medium Utility

Case IH Farmall® Utility C Series tractors handle any application. These deluxe utility tractors feature full power, full comfort, full features, and a variety of options. They are ideal for demanding livestock duties, larger hay operations and heavy loader work.

- ✓ **Horsepower Range:** 86 - 117
- ✓ **Transmission:** Power Shuttle

ROUND BALERS

Bale Wet Or Dry Crops

Case IH Round Balers are engineered to deliver high-quality bales with optimal density and shape. New and improved features include an uninterrupted high-capacity rotary feeding system, airtight net wrapping and many more advancements which enable you to power through even wet and heavy silage with ease.

- ✓ **Bale Width:** 46.5 - 61.5 in
- ✓ **Bale Diameter:** 30 - 75 in
- ✓ **Bale Weight:** 300 - 2,500 lbs

DISC MOWER CONDITIONERS

Better Crop Flow & Faster Dry Down

Case IH Disc Mower Conditioners excel with fast cutting and efficient conditioning for superior hay quality and windrow formation. Now with an expanded variety of new models with additional cutting widths, there's a model perfectly fit for your needs.

- ✓ **Cutting Width:** 9 ft, 2 in - 16 ft, 5 in
- ✓ **Disc Speed:** 2,250 - 3,000 rpm
- ✓ **Cutting Height:** 0.95 in - 3.2 in

SMALL SQUARE BALERS

High-Quality Bales Every Time

Case IH Small Square Balers produce high-quality bales up to 4.3 ft. long in many crop types and through the most challenging conditions. Featuring a heavy-duty eight-ball twine box and available with an optional bale thrower, these small-but-mighty balers offer years of consistent output.

- ✓ **Bale Cross Section:** 14 in x 18 in
- ✓ **Plunger Speed:** 93 spm
- ✓ **PTO HP Required:** 62 - 75 HP

LARGE SQUARE BALERS

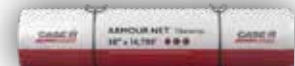

High Density, High Capacity

Case IH Large Square Balers offer higher capacity, enhanced bale density, and greater efficiency than ever before with steering sensors, lighting packages, heavy-duty pickup reels and additional twine storage. All these features help set new standards in operational performance, consistency and bale integrity.

- ✓ **Bale Width:** 32 - 48 in
- ✓ **Plunger Speed:** 48 spm
- ✓ **Number Of Pickup Tines:** 112 - 136

CNH CAPITAL FINANCING AVAILABLE!

INTRODUCING
CASE IH
FieldOps™

Purposefully designed to be a simplified and streamlined all-in-one operations management solution, **Case IH FieldOps™** empowers owners and operators to manage and visualize their fleet at anytime from anywhere.

One simplified, comprehensive platform for all your Case IH and multi-branded equipment. The new all-in-one **FieldOps™ mobile app** stores information from your entire connected fleet, providing one streamlined platform for all your equipment. This game-changing, cross-fleet compatibility puts all your equipment information in one place for all users.

FieldOps™ seamlessly connects and integrates agronomic insights and machine performance data, providing farmers with a comprehensive, real-time overview of their operations, no matter the brand makeup of their fleet. Redesigned with special attention to streamlining the user experience, **FieldOps™** makes it easy to access agronomic and machine data from anywhere.

KEY FEATURES

- ✓ **CONNECT YOUR FLEET**
Anyone can set up a free FieldOps account - producers with qualifying connected Case IH equipment can take advantage of all the features FieldOps offers
- ✓ **VIEW IN-CAB DISPLAY REMOTELY**
Give your operators the extra support they need with in-app, full-screen display viewing
- ✓ **DATA VISUALIZATION**
Analyze agronomic data and field conditions - make informed decisions while optimizing agronomic practices
- ✓ **REAL-TIME MACHINE MONITORING**
Get precise equipment location and duty status, monitor task completion and view 24-hour machine history
- ✓ **MACHINE PERFORMANCE TRACKING**
Monitor every detail of your fleet to make real-time decisions with machine analytics

HAVE EXISTING DATA PLATFORMS?
No Problem, FieldOps Can Connect!

Now more than ever, it is critical for farmers to have seamless integration and access to their various data platforms. Case IH has greatly expanded its API partnerships, which globally totals more than 40 as of June 2024 - offering easier access to agronomic and operational data, eliminating navigation challenges within digital platforms, and ultimately, increasing your productivity.
SEE SOME OF THE MOST POPULAR API DATA PARTNERSHIPS BELOW:

	transfer CNH files directly into the platforms of Ag Leader® through automatic processing in AgFiniti® or synced into SMS™, all through the power of Case IH FieldOps™ interface
	import ag operations data from your FieldView™ software account - enacted seamlessly via Case IH FieldOps™ platform
	enables viewing of machine data from your John Deere/mixed-brand fleet within the Case IH FieldOps™ interface
	enables viewing of location/machine data from Razor Tracked equipment through Case IH FieldOps™ platform

Customers who wish to activate the Connectivity Included feature on existing machines with compatible telematic modems and a Case IH FieldOps account (previously AFS Connect) can do so by contacting your local H&R Agri-Power Precision Ag Specialist - just scan the QR code below!

POTTER FARMS - NEW CONCORD, KY -

A VERSATILE, HAY-MAKING OPERATION

Dakota Potter, head of Potter Farms in New Concord, KY, knows a thing or two about making hay, working his land and the type of dedication, hard work and dependable machinery it requires. Dakota cut his teeth learning farm skills and haymaking from his grandfather years ago. "He had a small cattle farm and did his own hay - I always enjoyed it and was fortunate enough to eventually turn it into a business," Potter explains.

Today, the busy schedule of Potter Farms entails cutting, rolling, baling and the overall tending-to of about 500 acres of land - this includes their own private land plus a multitude of public jobs like land clean up, bush-hogging and even baling hay for Murray State University once a year!

The gradual expansion of the business led to Potter Farms officially adopting an LLC two years ago and saw Dakota dedicate himself to the farm full-time. From the very inception of the operation, Dakota recognized how crucial dependable equipment was to success. "Granddaddy always seemed to be having trouble with his brand of hay equipment, so, when I went out on my own, I always knew I wanted New Holland equipment," Potter recalls.

The operation started out with a modest fleet - one tractor, a New Holland disc mower, New Holland side rake and New Holland round and square balers. Over the years, as the hay operation has grown and evolved, they have upgraded consistently with a focus on New Holland brand. Currently, the farm boasts an impressive modern lineup of hay tools which includes a New Holland center-pivot Discbine mower-conditioner, New Holland hay rake, New Holland 4x6 round baler and New Holland square baler, with the oldest unit of the fleet being from 2019 model year.

As Potter Farms has grown its business, so has the strong connection with H&R Agri-Power. Dakota was actually an H&R employee right out of college from 2014 to 2016, so they were a logical dealership choice to rely on as he was building his

operation. Since his days with H&R and beyond, Dakota has maintained a trusted relationship with Daren Pingel (Mayfield, KY Store Manager). "Daren has always gone out of his way with getting us the best financing deals, especially in the early years that is so important. If something breaks down, he helps get a part or a rental tractor, whatever is needed, he's always there to help," Potter states.

With the wide variety of tasks the farm takes on, it does require a team effort. In addition to Dakota, his wife, Jennifer, part-time worker Lucas Hill, plus his dad all pitch in to keep the operation running smoothly. Not to mention his 5-year-old son, Ethan, who is learning the ropes as we speak!

But hey, it's not all work and no fun around the farm - H&R is a proud sponsor of Jennifer Potter's chuckwagon racing team, aptly named, "Momma's Gone Wild". The Potter family holds an annual chuckwagon race in Murray, KY that has become a highlight for the local community. In addition, Jennifer's

race team competes across several states throughout the year including AL, AR, IN, KY, TN and others.

Add this all up and Potter Farms certainly is one **versatile hay-making operation** with a multitude of tasks keeping them busy year-round. We thank Potter Farms for choosing dependable New Holland equipment and for making H&R Agri-Power their trusted dealership partner!

NEW HOLLAND

The Potter family -
Jennifer, son Ethan & Dakota

A FAMILY TREE OF SUCCESS

A successful nursery, like any farming operation, requires detailed planning, hard work, dedication, plus the right tools and equipment. Turner & Son's Nursery, a multi-generational operation in Smithville, TN has all these components for success in spades, as evidenced by their tremendous growth over the years.

Owners John and Terri Turner, along with their two sons, John Adam and Lee Allen, oversee this impressive nursery farm with 50 employees, 200-plus acres in bare-root tree production and 60-plus acres of container yard. The nursery has garnered quite a reputation for specializing in fruit trees, but also produces ornamental trees along with a variety of evergreens, shrubs and perennials.

But this sprawling, 300-plus acre operation didn't start out quite so large. The history of the nursery dates back to 1977 when John first began growing trees with his mother. In the following years, John and his wife, Terri, worked tirelessly on expanding the nursery and began selling container stock in 1995. Following the passing of John's mother in 1997, John and Terri took the reins of the family business and proceeded to grow it exponentially from a 15-acre operation to its current day 300-plus acre size, which includes approximately 60 acres with irrigation and greenhouses on-site to keep the plants healthy and fully hydrated.

Playing vital roles in the expansion and success of the nursery have been John and Terri's two sons - John Adam, who manages the container-growing operations and Lee Allen, who heads the field-growing operations. Both sons are proud graduates of the University of Tennessee Tech with degrees in agriculture.

An operation of this size certainly calls for several essential pieces of equipment - this is where the nursery's trusted association with the H&R Agri-Power Farm & Turf location in McMinnville, TN and their reliance on dependable Kubota equipment plays a big role. "We have had a great relationship with H&R Agri-Power Farm & Turf, whether it is equipment, repair, parts or sales. The staff is always friendly and eager to keep us moving forward with our operation," John explains.

Turner & Son's Nursery predominantly runs Kubota equipment and in the course of a year will utilize up to 15 tractors, 2 skid steers and 4 to 6 side-by-sides with various implements on a consistent basis, making their equipment fleet a vital part of the day-to-day business.

H&R Agri-Power Farm & Turf has been happy to provide next-level sales and support to the nursery as they've grown. The appreciation for this level of service is echoed by John when he states, "Eli Eldridge (McMinnville Sales) has been a key component in

the great relationship we have with H&R Agri-Power Farm & Turf. He always answers the phone and works hard to provide us with the most competitive options for our business. His role as salesman doesn't stop when the sale is finished, he truly wants to ensure the equipment and implements he sells suit our business and expectations."

As we look back on the history of the nursery, it's clear the Turner family has taken the farm to great heights from its humble beginnings and along the way managed to establish a real **family tree of success**.

We thank Turner & Son's Nursery for choosing reliable Kubota equipment and for making H&R Agri-Power Farm & Turf their trusted dealership partner!

The Turner family (left-to-right): Lee Allen, John, Terri & John Adam

MX Series

The Affordable, All-Season Workhorse You Can Count On

The MX Series tractor is designed to offer both affordability and year-round comfort. The tractor's horsepower ranges from 55.5 to 63.4, delivering ample power to handle a wide variety of tasks. This mid-size tractor is perfect for those who need a versatile, reliable machine for various agricultural or landscaping jobs.

✓ **Horsepower Range:** 55.5 - 63.4 ✓ **PTO:** 46.5 - 51.7 HP

M7 Series

Your Ultimate Farm Companion
